IN THE CLAIMS

Please amend the claims as follows:

Claims 1-15 (Canceled).

Claim 16 (New): An information storage medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising:

a control information area for storing,

a still picture audio/video file information table including still picture audio/video file information for managing the still picture video object,

original program chain information with which a whole of the still picture video object can be referred to by specifying first and last object numbers of the still picture video object, and

a user defined program chain information table including user defined program chain information with which a part of the still picture video object can be referred to by specifying one or more object numbers of the still picture video object,

wherein said still picture audio/video file information includes group information of the still picture video object,

said group information includes entry information of the still picture video object; and

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included.

Claim 17 (New): An information recording method for recording data on a medium, said medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising,

a control information area for storing,

a still picture audio/video file information table including still picture audio/video file information for managing the still picture video object,

original program chain information with which a whole of the still picture video object can be referred to by specifying first and last object numbers of the still picture video object, and

a user defined program chain information table including user defined program chain information with which a part of the still picture video object can be referred to by specifying one or more object numbers of the still picture video object,

wherein said still picture audio/video file information includes group information of the still picture video object,

said group information includes entry information of the still picture video object; and

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included,

said method comprising:

recording the audio/video data on the data area; and

storing the control information on the control information area.

Claim 18 (New): An information reproducing method for reproducing data from a medium, said medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising,

a control information area for storing,

a still picture audio/video file information table including still picture audio/video file information for managing the still picture video object,

original program chain information with which a whole of the still picture video object can be referred to by specifying first and last object numbers of the still picture video object, and

a user defined program chain information table including user defined program chain information with which a part of the still picture video object can be referred to by specifying one or more object numbers of the still picture video object,

wherein said still picture audio/video file information includes group information of the still picture video object,

said group information includes entry information of the still picture video object; and

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included,

said method comprising:

reproducing the control information from the control information area; and

reproducing the audio/video data from the data area.

Claim 19 (New): An information reproducing apparatus for reproducing data from the

medium as defined in clam 16, said apparatus comprising:

a first reproducer configured to reproduce the control information from the control

information area; and

a second reproducer configured to reproduce the audio/video data from the data area.
